WORKFLOW

USER ACTIVITIES

Access the web application

As a user, I need to visit the application to create an account, and sign in to my account.

Accessing groups

As a user, I need to be able to create a new study group, search and apply to join an existing study group.

Group management

As a user, I need to be able to accept or decline a join request, terminate a group member and leave a group.

Study Session management

As a user, I need to organise an online or face-to-face study session.

Group member interactions

As a user, I need be able to share relevant information to the study group.

As a developer, I need to create a database to persist the app data.

As a developer, I need to implement a sign-up page so that a user can have an account on the web app.

As a developer, I need to implement an option for a user to sign-in so that they can access the web app.

As a developer, I need to implement a homepage so that users can see their groups.

As a developer, I need to implement a functionality that allows a user to create a group.

As a developer, I need to implement an option that allows users to join a group.

As a developer, I need to implement an option for accepting or declining a join request.

As developer, I need to implement an option that allows the user to leave a group.

As a developer, I need to implement an option that allows users to set a meeting.

As a developer, I need to implement a functionality that allows group members to send messages on the group.
